# Coordinate formats

c:geo does support multiple coordinate formats as follows:

Format	Notation	Example	Description
MinDec	DDD° MM.MMM'	N 51° 20.382 E 007° 01.820	Degrees and decimal minutes
DMS	DDD° MM' SS.SSS"	N 51° 20' 22.920" E 007° 01' 49.200"	Degrees, decimal minutes and seconds
DegDec	DDD.DDDDD°	51.339700° 7.030333°	Decimal degrees only
UTM	ZONE EASTING NORTHING	32U E 362807 N 5689444	Universal Transverse Mercator

The MinDec format is commonly used for Geocaching purposes. For existing coordinates in cache or waypoints you can change the displayed format by short tap on the coordinates.

When using the [coordinate input dialog](#) you can select the desired format in the headline of the dialog according to the notations listed above except UTM, which is not yet supported as input format.
