Go to menu

The "Go to..." menu can be used to navigate to arbitrary coordinates not bound to any geocache or geocache waypoint or to make a waypoint projection.

Technically the "Go To..." menu brings you to the waypoint tab of a c:geo internal cache. So the usage is exactly the same like for waypoints of every other cache in c:geo.

Icon	Description
×	A short click on this icon will start your preferred navigation tool to navigate to the selected cache. A long press will start your secondary preferred navigation tool.
×	Will open the complete list of available navigation tools
×	Clicking here will open the menu of functions not fitting into the top bar on your device, thus being displayed as a list instead. The function shown in this list are also described in this table.
Caches around	Will conduct a nearby search around the given coordinates
Clear History	Will clear the history entries on the lower section of the screen.
