Pocket Queries 2

Pocket Queries

This function allows to view the existing pocket queries on the geocaching server and either show them as a [list](#) or import the whole pocket query similar to [importing a GPX file](#).

This menu is only available for geocaching.com premium members as pocket queries are a premium feature.

**Fix Me!****Short explanation, screenshot and refer to lists / search result pages**

This page under mainmenu or on root for the topic „Offline caching“?
