Search function

×

The search menu provides several search functions as described below. All location and user based searches will provide a list of caches as result, whereas the geocode search and the trackable search will directly open the resulting geocache details or trackable details.

3/4

| ← Search | Hidden by |
|-----------------------|--------------------------|
| - Coordinates | Owner |
| Latitude | Search by owner name |
| Longitude | Trackable |
| Search by coordinates | Trackable identification |
| Address | Search for trackable |
| Address | |
| Search by address | |

| GC | |
| Search by geo code | |
| Keywords | |
| Keyword | |
| Search by keyword | |
| Found by | |
| User name | |
| Search by user name | |

Basically all search functions will use all enabled geocaching platforms simultaneously and provide the result in a combined list across all geocaching services. This depends on the functions supported by the specific geocaching service as listed in the service setting menu.

| Search Function Description | |
|-----------------------------|---|
| × | Clicking this icon will load a list of your owned caches |
| IL OOLOIDATES | Search for caches around coordinates provided. Refer to the Coordinate dialog for more information. |

| Search Function Description | | | |
|-----------------------------|--|--|--|
| Address | Search for caches around a street address. We use the Google geo coding service to find the address and convert it into coordinates. If the address has been found you can either load the list of caches nearby this location or open the live map at this address by clicking on the small map icon shown in the search result. | | |
| Geo Code | Search for a specific geo code in all supported platforms depending on the code prefix (e.g. GC77, OC1234). | | |
| Keywords | Search for caches starting with the keyword provided. A keyword search for all caches containing the keyword is currently not possible due to technical limitations. | | |
| Found by user | Search for caches found by the username provided. | | |
| Hidden by user | Search for caches hidden by the username provided. | | |
| Trackable | Search for a trackable by using its public or secret tracking code. This search supports geocaching.com trackables as well as other trackable services (e.g, GeoKrety). | | |
