Utility programs

This function will open a screen showing apps, which might either work in conjunction with c:geo or can be used to enhance some features in c:geo:

Logo	Name	Description	
	Send to c:geo	Send to c:geo is a browser extension for your PC. When browsing geoaching.com, you can send caches to your smartphone with the click of a button directly inside your browser.	
	c:geo contacts plugin	Enables you to open a contact card (of your address book) directly from a log entry, so you can more easily ask friends for help.	
	Brouter Offline Navigation	BRouter provides offline routing. If it is isntalled and has the necessary files downloaded, c:geo will automatically show a route to the cache on the normal internal map.	
	Pocket Query Creator	Allows easy creation (and download) of Pocket Queries centered on your current position or a point selected from a map. Requires a geocaching.com premium membership.	

Logo	Name		Description	
	[Google Translator](#)		If you download translation packages in the Google Translator app, then you can easily translate cache descriptions and log entries in c:geo by a long click on the text (even without an internet connection).	
	[https://play.google.com/store/apps/details?id=menion.android.whereyougo WhereYouGo]]		WhereYouGo allows playing and searching geocaches of the type Whereigo. c:geo can automatically trigger the download of cartridges within this app.
