# Map Sources

The following map types are available in c:geo. You can change between the map types in the [settings](#) or in the menu of the [map](#).

| Name              | Description  |
|-------------------|--|
| Google:Map        | An online street map provided by <a href="#">Google</a> .  |
| Google:Satellite  | An online satellite view map provided by <a href="#">Google</a> .  |
| OpenStreetMap.org | An online street map provided by <a href="#">OpenStreetMap.org</a> .   |
| OpenStreetMap.de  | An online street map provided by <a href="#">OpenStreetMap.de</a> .  |
| CycleOSM          | An online map targeted to bicycle riding provided by <a href="#">CyclOSM.org</a> .   |
| OSM:Offline       | <a href="#">Offline maps</a> rendered from map files in <a href="#">Mapsforge</a> format.<br>Instead of OSM:Offline the names of the available map file will be shown in the selection menu. |

Currently c:geo does only support Google maps v1, which are not supporting rotation of the maps. Thus all maps are always displayed northbound. We are however working on implementing a newer Google maps version.
