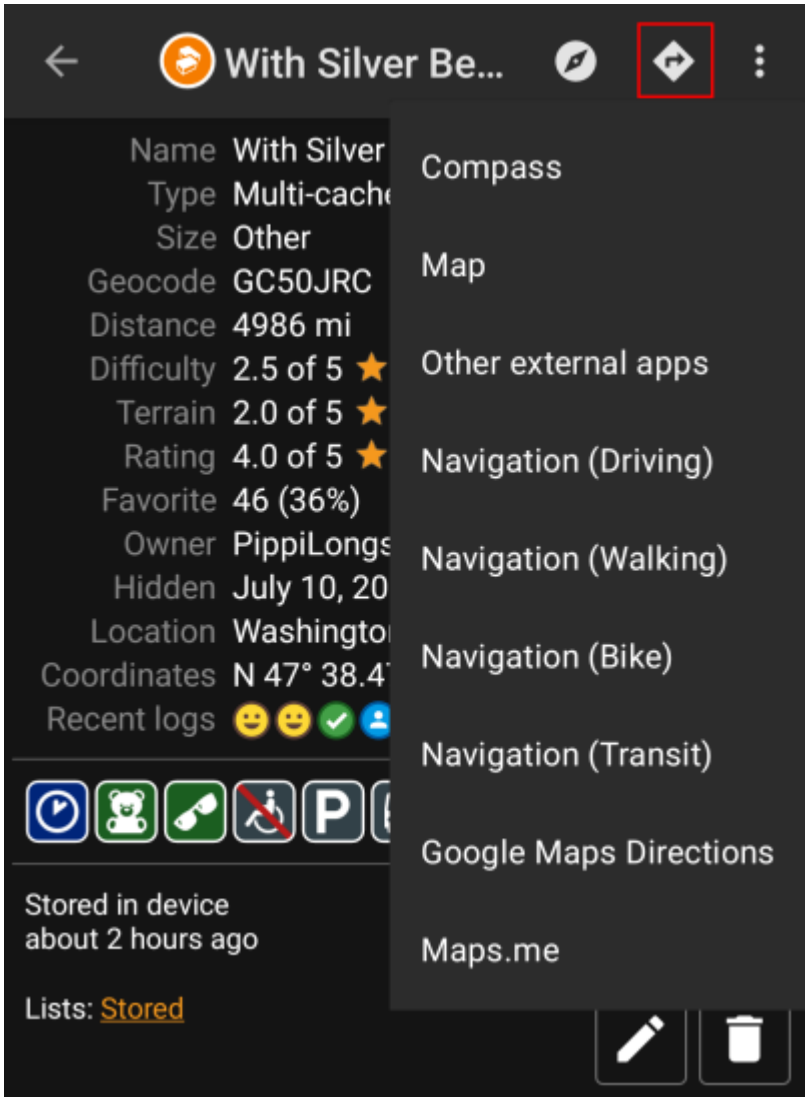
# Navigation methods/tools

When invoking a navigation towards coordinates the following menu will be shown to select an appropriate navigation method/tool.



The following table provides an overview of the different methods/tools supported. Some items are only shown if the corresponding tool is installed. You can customize the items shown in this menu in the settings.

| Name | Description |
|---|---|
| Compass | Starts the c:geo built-in compass. |
| Radar | Starts apps supporting a radar functionality, such as GPS Status & Toolbox.<br>A radar is similar to a compass but showing your position in the center and the target position in relation to this. |
| Map | Opens the c:geo map |
| Static Maps | Opens the static maps previously downloaded |
| Download Static Maps | This option is available only in case static maps have not yet been downloaded and will try to download the static maps. |
