# Navigation methods/tools

When invoking a navigation towards coordinates the following menu will be shown to select an appropriate navigation method/tool.

The following table provides an overview of the different methods/tools supported. Some items are only shown if the corresponding tool is installed. You can customize the items shown in this menu in the [settings](#).

| Name                 | Description   |
|----------------------|---|
| Compass              | Starts the c:geo built-in <a href="#">compass</a> .   |
| Radar                | Starts apps supporting a radar functionality, such as <a href="#">GPS Status &amp; Toolbox</a> . A radar is similar to a compass but showing your position in the center and the target position in relation to this. |
| Map                  | Opens the c:geo <a href="#">map</a>   |
| Static Maps          | Opens the <a href="#">static maps</a> previously downloaded   |
| Download Static Maps | This option is available only in case <a href="#">static maps</a> have not yet been downloaded and will try to download the static maps.  |
| Locus                | Starts <a href="#">Locus</a> to display the coordinates on the map.   |
| Navigation (Driving) | Starting <a href="#">Google Maps</a> turn-by-turn navigation using the preferences for a car route.   |
| Navigation (Bike)    | Starting <a href="#">Google Maps</a> routing turn-by-turn navigation the preferences for a bike route.  |
| Navigation (Walking) | Starting <a href="#">Google Maps</a> routing turn-by-turn navigation the preferences for a walk route.  |

| Name                   | Description   |
|------------------------|---|
| Navigation (Transit)   | Starting <a href="#">Google Maps</a> routing turn-by-turn navigation the preferences for a route with transit providers.  |
| Street View            | Start <a href="#">Google Street View</a> on the coordinates.  |
| OruxMaps (Online)      | Start <a href="#">OruxMaps</a> using online turn-by-turn navigation.  |
| OruxMaps (Offline)     | Start <a href="#">OruxMaps</a> using offline turn-by-turn navigation.   |
| Sygic (Walking)        | Start <a href="#">Sygic</a> turn-by-turn navigation using preferences for a walk route.   |
| Sygic (Driving)        | Start <a href="#">Sygic</a> turn-by-turn navigation using preferences for a car route.  |
| OsmAnd                 | Start <a href="#">OSMAnd</a> offline turn-by-turn navigation.   |
| Google Maps Directions | Opens <a href="#">Google Maps</a> to show a list of driving directions from your current position to the coordinates.   |
| WhereYouGo             | This item is only available for WhereiGo caches and will open <a href="#">WhereYouGo</a> to download the needed cartridge and further navigate through the stages of the cache.                                 |
| Pebble                 | Start compass on your pebble device using the <a href="#">Pebble Navigation</a> app.  |
| Maps.me                | Start offline turn-by-turn navigation using the <a href="#">maps.me</a> app.  |
| Other external apps    | This invokes other apps not explicitly supported by c:geo.<br>Using this option will usually open an app selection dialog on your device presenting all apps capable of digesting links containing coordinates. |
