Waypoints created for coordinates in personal notes

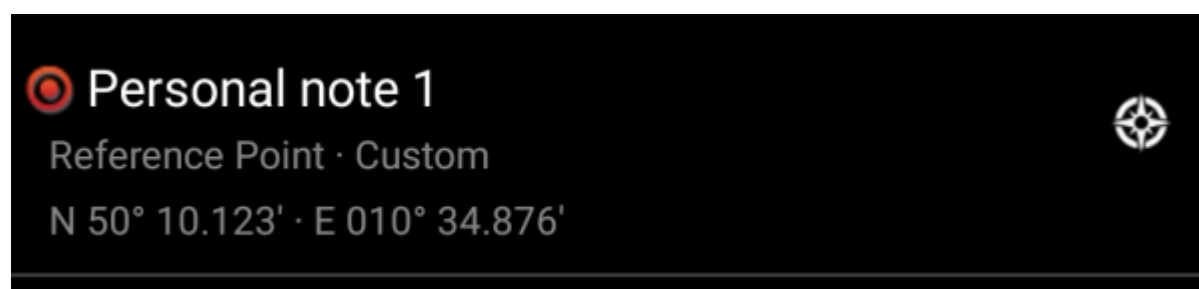

Automatic creation of waypoints

If your [personal note](#) of a cache contains valid coordinates (e.g. N50 10.123 E010 34.876) c:geo will automatically create a waypoint from it in the [waypoint tab](#) of this cache.

If for example this is the content of your personal note:

c:geo will automatically create this waypoint for it:

Subsequent coordinates in your personal note will also be transferred to a waypoint in the same way and the waypoint name numbered accordingly.

If the owner defined waypoints of a cache contain the same coordinates as your personal note, c:geo will not create a waypoint for these coordinates as it assumes them to be an unnecessary duplicate in this case.

Automatic creation of waypoints
