Waypoints created for coordinates in personal notes

Automatic creation of waypoints
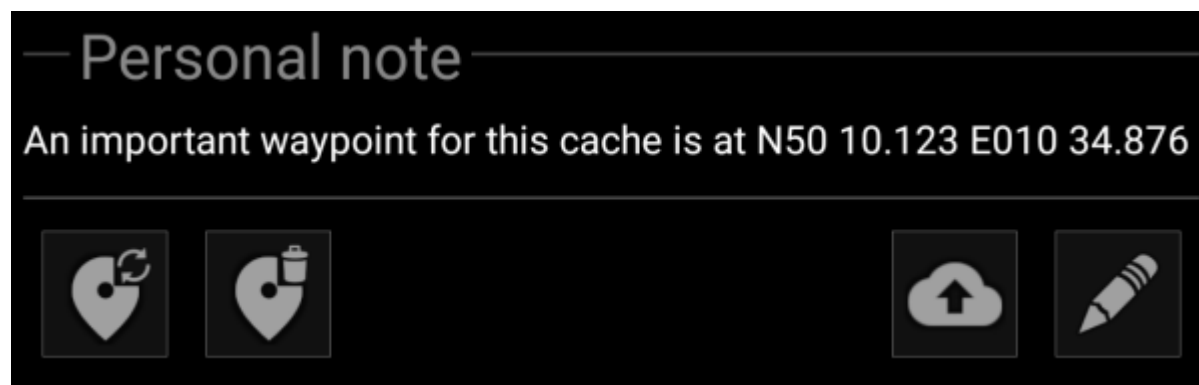

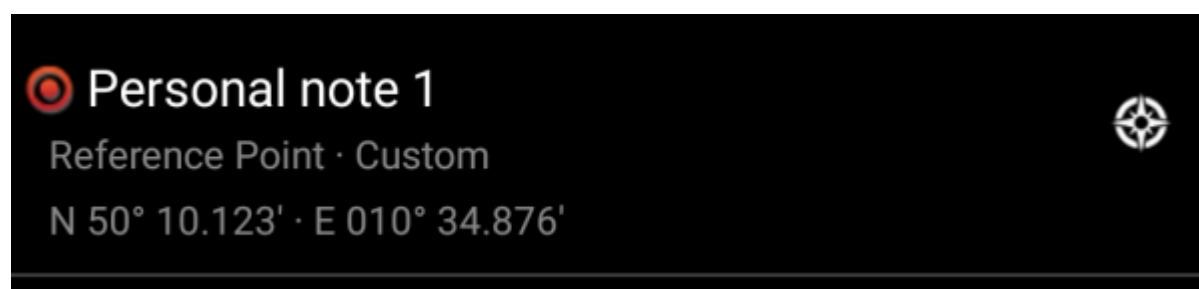

If your personal note of a cache contains valid coordinates (e.g. `N50 10.123 E010 34.876`) c:geo will automatically create a waypoint from it in the waypoint tab of this cache.

If for example this is the content of your personal note:

c:geo will automatically create this waypoint for it:

Subsequent coordinates in your personal note will also be transferred to a waypoint in the same way and the waypoint name numbered accordingly.

> 💡 If the owner defined waypoints of a cache contain the same coordinates as your personal note, c:geo will not create a waypoint for these coordinates as it assumes them to be an unneccesary duplicate in this case.

Using keywords for waypoint types

Normally c:geo will define the waypoint type for coordinates found in the personal note as `Reference Point`, however you can use keywords in your personal note to enforce another waypoint type being used:
