Welcome to the c:geo online user guide!

About c:geo

c:geo is an open source, full-featured, always ready-to-go unofficial Android client for geocaching.com and offers basic support for other geocaching platforms (such as Opencaching). It does not require a web browser or exports - just install it and start right away.

c:geo is only a client application for geocaching and is not associated with any specific geocaching service provider.

Getting Started

- Installing and updating c:geo - How to download, install, and get updates for c:geo
- c:geo device permissions - Device permissions needed for using c:geo
- First steps with c:geo - How to authenticate with geocaching services in c:geo
- Basic c:geo usage - What is geocaching and how to find your first geocache with c:geo
- Login problems - What to do in case of login problems?

Users' Manual
