c:geo User Guide

Welcome to the c:geo online user guide!

This site is currently under construction!

While we consider the user guide completed for now, we would like to get your feedback first. If you notice any missing information or see any incomplete or wrong descriptions, please provide your feedback!

We have started translating this guide to other languages. We need contributors who are willing to help us translate into their mother language. If you are interested in helping, just let us know.

About c:geo

c:geo is an open source, full-featured, always ready-to-go unofficial Android client for geocaching.com and offers basic support for other geocaching platforms (such as Opencaching). It does not require a web browser or exports - just install it and start right away.

c:geo is only a client application for geocaching and is not associated with any specific geocaching service provider.

Getting Started

- Installing and updating c:geo - How to download, install, and get updates for c:geo
- c:geo device permissions - Device permissions needed for using c:geo
- First steps with c:geo - How to authenticate with geocaching services in c:geo
- Basic c:geo usage - What is geocaching and how to find your first geocache with c:geo

Users' Manual
