c:geo User Guide

Welcome to the c:geo online user guide!

About c:geo

c:geo is an open source, full-featured, always ready-to-go unofficial Android client for geocaching.com and offers basic support for other geocaching platforms (such as Opencaching). It does not require a web browser or exports - just install it and start right away.

c:geo is only a client application for geocaching and is not associated with any specific geocaching service provider.

Getting Started

- [Installing and updating c:geo](#) - How to download, install, and get updates for c:geo
- [c:geo device permissions](#) - Device permissions needed for using c:geo
- [First steps with c:geo](#) - How to authenticate with geocaching services in c:geo
- [Basic c:geo usage](#) - What is geocaching and how to find your first geocache with c:geo

Users' Manual

Main screen

- [Main screen](#) - Access the main functions of c:geo
 - [Top bar menu](#) - Access additional functions
 - [Live Map](#) - View a live map of geocaches
 - [Nearby Search](#) - Search for caches near you
 - [Stored Caches](#) - View locally stored geocaches
 - [Search](#) - Search for geocaches and trackables
 - [Go to](#) - Navigate to arbitrary coordinates
 - [Global Cache Type Filter](#) - Filter the displayed cache types

- [Bottom section](#) - Monitor your status information
- [Settings](#) - Configure the application

Geocaches

- [Geocache details](#) - View geocache details
- [Logging of Geocaches](#) - Log your geocache finds

Trackables

- [Trackable details](#) - View trackable details
- [Trackable handling](#) - Search for and log trackables

Coordinates and navigation

- [Coordinate input dialog](#) - Enter specific coordinates
