# c:geo User Guide

#### Welcome to the c:geo online user guide!

### About c:geo

c:geo is an open source, full-featured, always ready-to-go unofficial Android client for geocaching.com and offers basic support for other geocaching platforms (such as Opencaching). It does not require a web browser or exports - just install it and start right away.

c:geo is only a client application for geocaching and is not associated with any specific geocaching service provider.

## **Getting Started**

- Installing and updating c:geo How to download, install, and get updates for c:geo
- c:geo device permissions Device permissions needed for using c:geo
- First steps with c:geo How to authenticate with geocaching services in c:geo
- Basic c:geo usage What is geocaching and how to find your first geocache with c:geo
