Trackable handling

Ondersteunde trackables

c:geo ondersteunt diverse typen trackables verstrekt door de verschillende platformen:

Icoon	Type	OMSCHRIJVING	Functie
	Travel Bug	Trackable van geocaching.com	Volledige ondersteuning van alle trackable functies.
	GeoKrety	Trackable van geokrety.org	Volledige ondersteuning van alle trackable functies.
	GeoLutin	Trackable van geolutins.com	Alleen zoeken van trackables en de informatie over deze trackable.

Zoeken van een trackable

De meeste trackables hebben twee verschillende opzoekcodes, die kunnen worden gebruikt om de trackable te identificeren en te zoeken:

- **Publieke trackable code:**
  The niet geheime trackable code (e.g. TBxxxx, GKxxxx, GLxxxx). Deze code kan worden gebruikt om te zoeken naar de trackable en de details ervan te tonen, maar kan niet worden gebruikt voor het registreren van de trackable.
  \\Je kunt de openbare trackingcode gebruiken om naar een trackable te zoeken met behulp van de zoekfunctie of de qsnel zoeken balk.

  De zoekopdracht toont je de trackable details van de trackable, vanuit waar je kunt beginnen met het loggen van de trackable (als je ook de geheime tracking code weet).

- **Geheime trackable code:**
  Een niet-publieke tracking code die alleen op de trackable staat. Deze code is nodig om een trackacble te kunnen loggen en om te bewijzen dat je de trackable fysiek hebt gezien/verplaatst.

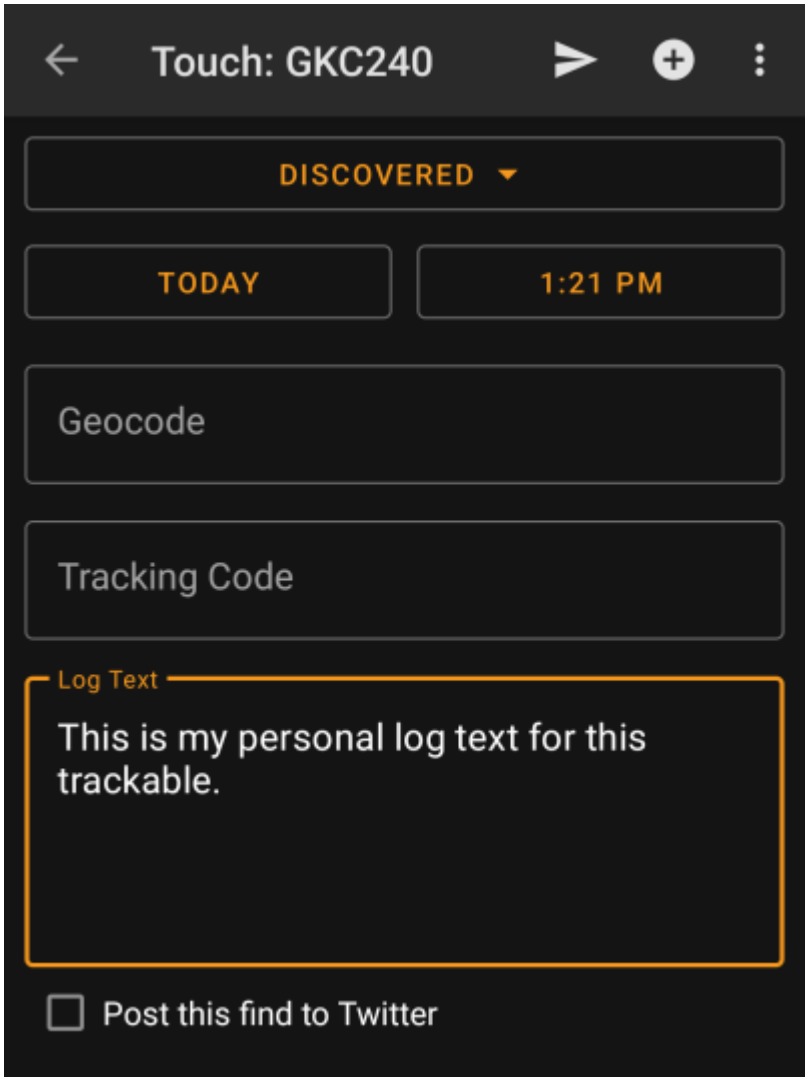
  De geheime trackingcode is vereist bij het samenstellen van je trackable log vermelding. Voor trackables van geocaching.com kun je ook de geheime code in deZoeken functie. Dit werkt niet voor andere trackable merken dan Travel Bugs omdat c: geo de trackable niet onderscheiden met de geheime code en gaat er daarom vanuit dat geocaching.com de standaard is.

  De snelle zoekbalk kan ook worden gebruikt om de trackable te zoeken met de geheime coden, tenzij de code toevallig begint met een code zoals een geocache (bijv. GCxxxx, OCxxxx, OUxxxx), in dit geval kun je niet op geheime code zoeken. Gebruik in dit geval de zoek functie.

  De zoekopdracht toont je de trackable details van de trackable, vanuit waar je de trackable kun loggen.

Logging a trackable

From the trackable details view you can start logging the trackable, which will open this logging screen:



Top Bar Menu

The icons shown in the top bar and the contents behind the overflow menu button are distributed dynamically based on your device resolution and screen orientation. Thus it might be possible, that more or less items can be found behind the menu button or instead shown as icons in the top bar on your device.
In case a menu entry is shown as an icon you can long press the icon to get a popup showing its function.

Icon	Function	Description
	Send log	Use this button to send your log online after you finished composing it.
	Add a template	This allows you to either add a template or your signature to the log.

Icon	Function	Description
	Menu overflow button	Clicking here will open the menu of functions not fitting into the top bar on your device, thus being displayed as a list instead. The function shown in this list are also described in this table.
	Smilies	Opens a list of smiley tags you can insert into your log.
	Repeat last log	This function will insert the log text of the last trackable you logged into the log text field.

Log type

Depending on the trackable brand, its current state and if you are owner of the trackable, different log types can be selected by clicking on this field:

Log Type	Description
Retrieved	You retrieved this trackable from the geocache, where it is currently listed.
Discovered	You only want to report, that you have seen this trackable but did not perform any other action with it.
Dropped Off	You placed this trackable into a geocache. This log type is only available for GeoKrety, as geocaching.com dropped off logs are always combined with a cache log and therefore included on the geocache logging page.
Visited	You want to let this trackable visit a geocache. This log type is only available for GeoKrety, as geocaching.com visited logs are always combined with a cache log and therefore included on the geocache logging page.
Grabbed somewhere	You want to transfer this trackable into your inventory but did not find it in a cache but grabbed it from another user or an unknown location.
Note	You want to write a comment/note for this trackable.
Move to Collection	If a geocaching.com trackable is marked as collectible, you can use this log type to move the trackable from your inventory to your personal trackable collection.
Move to Inventory	If a geocaching.com trackable is currently in your collection, you can use this log type to move the trackable to your inventory.

Log date/time

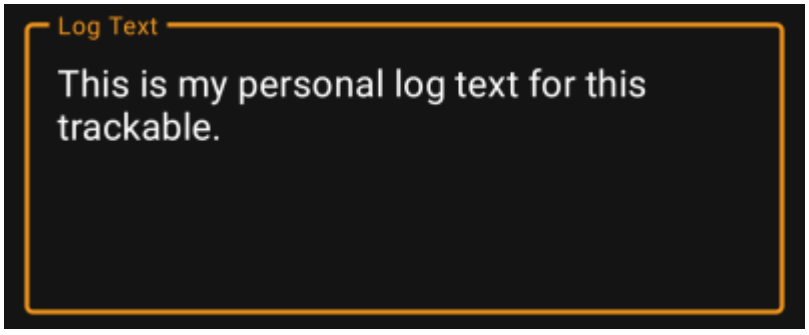
Select the date (and time - only supported for GeoKrety) associated with your log.

Tracking code

Enter the secret tracking code into this field before posting your log. You will need the secret code to post any log besides `Note`. GeoKrety also requires the secret code to post a `Note`.

The secret code will be already shown in this field if you used it to search for this trackable or if this trackable is currently in your inventory.

Log text



Enter your individual log into this field.

Social media

If you connected c:geo with Twitter in the settings this field will be shown. If you enable the checkbox c:geo will post a tweet in parallel to sending this log.

Special fields

In case you compose a `Dropped Off` log for a GeoKrety trackable, you will need to define the geo code and/or the coordinates of the cache, where you dropped this trackable.

Use the field `Geo code` to enter the geo code of the cache where your dropped the trackable or click on `Coordinates` to open the coordinate input dialog and enter the coordinates, where you dropped off the trackable.

Trackable Inventory

The trackable inventory is the list of all trackables you currently have in your hands (i.e. you retrieved them from a cache or grabbed them from another user).

At the moment c:geo does not support a dedicated view of your trackable inventory. However you will see you complete inventory on the inventory section of the cache logging page, while composing a log for a geocache.
