Primeiros passos no c:geo

Para utilizar o c:geo, será nessessário uma conta numa plataforma geocaching. Neste momento, o c:geo suporta o geocaching.com, uma plataforma comercial internacional, assim como plataformas Opencaching em diversos paises (por exemplo, Opencaching USA, Opencaching UK e muitas mais). Selecione a plataforma que pretende usar e crie uma conta na sua página (Contas basicas normalmente são gratuitas). Sem uma conta numa destas plataformas de geocaching o c:geo não irá funcionar!

Registering c:geo with geocaching.com

If you start c:geo for the first time after installation, you will be directly taken to the service settings where you can enter your username and password for geocaching.com.

If you would like to access the service settings for geocaching.com again after the first start, you will find them in:

Menu \rightarrow Settings \rightarrow Services \rightarrow geocaching.com

Click on the button Authorize c:geo as shown below::

After clicking on Authorize c:geo a window will be shown, where you can enter your username and password for geocaching.com and finally click on Check authentication.

If you do not yet have an account, you may click on the button Create an account to open the registration page of geocaching.com.

🥪 c:geo
The following process will allow c:geo to access Geocaching.com.
Filling your credentials and pressing the "Check authentica- tion" button will start the process. This process will connect to Geocaching.com and validate your credentials. That's all.
My Username
••••••
Check authentication
Create an account

After completing the registration, c:geo will automatically return to the service menu and you can see the successful registration as your username and your avatar will be shown:

SETTINGS	
Activate	×
Authorize c:geo with geocaching.co caches.	m to search for
Authorize c:geo again Connected as My Username	C.Sea
Options for Basic Members	

Now you just have to select the back function on your device to reach the main menu of c:geo. At next start of c:geo you will be automatically taken to the main menu.

Registering c:geo with Opencaching platforms

If you want to connect c:geo with another service than geocaching.com or re-access the service settings, you will find them in:

Menu \rightarrow Settings \rightarrow Services

Select a geocaching platform , which you want to connect with and activate the service in the following screen by clicking the Activate box. Afterwards start the authorization process by clicking on Authorize c:geo.

Searching.us	
SETTINGS	
Activate Load caches from opencaching.us	V
Authorize c:geo with opencaching.us to search f caches and access/filter your found caches.	or
Authorize c:geo Not connected yet	

and Start authorization in the next screen. If you do not yet have an account, you may click on the button Create an account to open the registration page of the Opencaching platform.

You will now be taken to the web page of the Opencaching platform in your browser. Login to the web page with your username and password and - where required - agree on the following page to give c:geo access to your Opencaching account.

5/5

After completing the registration c:geo should open again and report the successful registration:

0

If you receive an error message or you do not return to c:geo, please try to use another browser for registration. Please also check, if date and time on your device are correctly set.
