Search function

The search menu provides several search functions as described below. All location and user based searches will provide a [list of caches](#) as result, whereas the geocode search and the trackable search will directly open the resulting [geocache details](#) or [trackable details](#).

The image displays two overlapping screenshots of a mobile application interface. The background screenshot shows a search menu with options like "Coordenadas", "Endereço", "Geo código", "Palavras-chave", and "Encontradas pelo utilizador". Each option has a corresponding input field and a search button below it. The foreground screenshot, which is slightly offset to the right, shows a similar search menu but with different options: "Palavra-chave", "Encontradas pelo utilizador", "Nome de utilizador", "Pesquisar por utilizador", "Escondida pelos utilizadores", "Dono", "Pesquisar pelo dono", "Trackable", "Identificação do trackable", and "Pesquisar por trackable". Both interfaces feature a dark theme with light-colored text and buttons.

Basically all search functions will use all enabled geocaching platforms simultaneously and provide the result in a combined list across all geocaching services. This depends on the functions supported by the specific geocaching service as listed in [the service setting menu](#).

Search Function	Description
	Clicking this icon will load a list of your owned caches
Coordinates	Search for caches around coordinates provided. Refer to the Coordinate dialog for more information.
Address	Search for caches around a street address. We use the Google geo coding service to find the address and convert it into coordinates.
Geo Code	Search for a specific geo code in all supported platforms depending on the code prefix (e.g. GC77, OC1234).

Search Function	Description
Keywords	<p>Search for caches starting with the keyword provided.</p> <p> A keyword search for all caches containing the keyword is currently not possible due to technical limitations.</p>
Found by user	Search for caches found by the username provided.
Hidden by user	Search for caches hidden by the username provided.
Trackable	Search for a trackable by using its public or secret tracking code. This search supports geocaching.com trackables as well as other trackable services (e.g, GeoKrety).
