# Aplicações Uteis

Esta função irá abrir um ecrã com algumas aplicações que, funcionam em conjunto com o c:geo, ou poderão ser utilizadas para melhorar algumas funções do c:geo. Poderá carregar em cada uma das ferramentas para abrir uma página onde poderá obter mais detalhes sobre a mesmo e/ou fazer o download da mesma.

| Logótipo | Nome | Descrição |
|---|---|---|
| | Send to c:geo | O Send to c:geo é uma extensão para o browser no seu computador. Ao navegar no geoaching.com, poderá enviar caches diretamente para o seu smartphone carregando apenas um botão no browser. |
| | c:geo contacts plugin | Enables you to open a contact card (of your address book) directly from a log entry, so you can more easily ask friends for help. |
| | Brouter Offline Navigation | BRouter provides offline routing. If it is installed and has the necessary files downloaded, c:geo will automatically show a route to the cache on the normal internal map. |
| | Pocket Query Creator | Allows easy creation (and download) of Pocket Queries centered on your current position or a point selected from a map. Requires a geocaching.com premium membership. |
| | Google Translator | If you download translation packages in the Google Translator app, then you can easily translate cache descriptions and log entries in c:geo by a long click on the text (even without an internet connection). |
| | WhereYouGo | WhereYouGo allows playing and searching geocaches of the type Wherigo. c:geo can automatically trigger the download of cartridges within this app. |
| | GPS Status & Toolbox | You can use the radar in this application in conjunction with c:geo. It also offers a lot of other GPS-related information. |

| Logótipo | Nome | Descrição |
|---|---|---|
| | Bluetooth GPS | Allows to use an external GPS receiver to get more precise location data, and you can spare battery of your device.<br><br>Please note, that you have to disable the usage of Google Play Services in c:geo settings to use a Bluetooth GPS. |
| | Barcode Scanner | There are Greasemonkey scripts and websites which enable display of geo codes as bar codes. With this app, c:geo can read such geocodes directly from the screen of your computer. |
| | Locus | Outdoor navigation app for your phone or tablet. View topographic maps offline, track your route, hunt geocaches, use a voice guide and do even more. |
